Hi Ravi,  
This attachment that was sent to you has the track changes

**Subject:** Cancer dose-response revisions in overview

Hi Ravi (and David),

As you know, we were asked to revise the section on quantification of the potential cancer risks after discussion with the IOAA and Tina. Please see the revised version attached. We wanted to make sure you were comfortable with the presentation of the animal nasal cancer quantification (which is essentially unchanged, but has been moved, so we want to be sure nothing has shifted during editing). We are currently editing the main draft in a consistent manner.

We would appreciate it if you would please take a quick look. We are hoping to send it to Tina early next week (Bob had asked to see what the revision would look like; note: we will also have to edit these sections to be more careful about wording the cancer hazard calls with study-specific context, at Bruce's request [not yet completed]).

Thanks,  
Andrew and Barbara
